Engineered to fit

The perfect complement for digital conference recording systems. The Philips conference microphone delivers brilliant sound quality, accompanied by outstanding ease of use. Revolutionary technology in a straightforward form.

Supreme user-friendliness

- Fast and easy set up for hassle-free installation
- No microphone stand required

Crystal clear sound

- Sound pick-up from a 360 degree radius for a perfect recording experience
- Boundary layer design utilizes the acoustic pressure of the surface

Simply smart

- Expandable through cascading
- Wire storage and length adaptation build into base

PHILIPS

sense and simplicity

Technical specifications

Specifications

- **Design:** Boundary layer microphone
- **Type:** Electret condenser microphone
- **Output impedance:** approx. 2.2 kOhm @ 1 kHz
- **Sensitivity:** -38 dBV
- **Frequency response:** 30 Hz – 18 kHz
- **Phantom supply voltage:** 1,5 to 5 V/ 0,5mA

Connectivity

- **Audio plug:** 3.5mm
- **Audio jack (for cascading):** 3.5 mm
- **Cable length:** 2 m / 6.5 ft.

Dimensions

- **Product dimensions (WxDxH):** 130 x 130 x 18 mm / 5.1 x 5.1 x 0.7 in.
- **Net weight:** 108 g / 3.8 oz

Green specifications

- Compliant to 2002/95/EC (RoHS)
- Lead-free soldered product

Operation conditions

- **Temperature:** 5° - 45° C / 41° - 113° F
- **Humidity:** 10 % - 90 %

Package contents

- Conference microphone
- Adapter plug (3.5mm to 2.5mm)
- Adapter plug (analog)

Accessories

- Conference Recording System 955
- Philips Digital Pocket Memo Series

Product highlights

Incorporates 50 years of experience

Philips Speech Processing has designed professional dictation systems for more than 50 years. Based on this experience, as well as on customer requirements Philips has now created a groundbreaking microphone system that uses the effect of the acoustic pressure of the surface.

Configurable to individual needs

In order to meet the future needs of your business, the daisy chain feature of the boundary layer microphone allows the connection of up to 6 microphones to the recording device for larger tables.

360 degree pickup

The revolutionary boundary layer microphone is, as opposed to other prevalent devices, non-directional. The design allows sound pick-up from a 360 degree radius, so that no important details are lost.

Easy setup and maintenance

The conference microphone is easy to set up and put into operation. Unlike other systems, there is no microphone stand required; just placed it on the conference table. For maximum convenience, the cable storage is integrated into the base of the microphone.

Everything you need

Philips accessories are designed to help you make the most of your Philips dictation devices. They guarantee optimal results and ensure that your Philips products enjoy a long life.
